

# 1653 Athlete Cardiac Arrests or Serious Issues, 1148 of Them Dead, Since COVID Injection

It is definitely not normal for so many mainly young athletes to suffer from cardiac arrests or to die while playing their sport, but this year it is happening. Many of these heart issues and deaths come shortly after they got a COVID vaccine. While it is possible this can happen to people who did not get a COVID vaccine, the sheer numbers clearly point to the only obvious cause.

**Important Notes:** The number of dead are included in the total number. There are also dozens of reports that are not included in the total number shown in the headline because they are not or may not be vaccine-related, in our judgement.

The so-called health professionals running the COVID vaccine programs around the world keep repeating that *“the COVID vaccine is a normal vaccine and it is safe and effective.”*

In response to their pronouncement, here is a non-exhaustive and continuously growing list of mainly young athletes who had major medical issues in 2021/2022 after receiving one or more COVID vaccines. Initially, many of these were not reported. We know that many people were told not to tell anyone about their adverse reactions and the media was not reporting them. They started happening and ramping up after the first COVID vaccinations. The mainstream media still are not reporting most, but sports news cannot ignore the fact that soccer players and other stars collapse in the middle of a game due to a sudden cardiac arrest. Many of those die – 69.4% as at 31st December 2022.

We also note that many posts in Facebook, Instagram, twitter, forums and news stories are being removed. So now we are receiving some messages saying there is no proof of the event or of vaccination status. That is partly because this information is being hidden.

More people are writing to tell us that in many cases, we didn't mention a person's vaccination status. There is a good reason for that. None of the clubs want to reveal this information. None of their sponsors want to reveal it. The players have been told not to reveal it. Most of their relatives will not mention it. None of the media are asking this question. So what should we do? Stop this now? No, we will collect as much information as we can, while it is still available, because eventually, more information will come out, and we will be here to put it together. Will it mean anything? We don't know. What we do know is that there is a concerted world-wide effort to make this information go away, so that fact alone tells us it must be collected, investigated and saved so other researchers can look at it to see if there are any useful patterns.

We replaced about a dozen occurrences of the word "shot" with "injection" because translation into other languages is improved, on advice from a reader.

We really appreciate the athletes named in this list (or their families) who have confirmed what happened to them so the truth can be known. They care about their fellow athletes, even if the clubs, their sponsors, media, politicians and so-called health professionals do not.

Contained in the list are many professional athletes and high level amateur athletes. It would not be sensible to try to report the death of every person on the planet, so we have selected a category of person who should be fit enough to lead a long and healthy life. This means that provided a person is reasonably fit, healthy and does some athletic activity, rather than an unfit "couch potato," then they can be included in this list. Needless to say, these are only the persons reported to us by readers or that we discovered during research. Also note that almost all of these have been reported in the media. In some cases, we have a person's own social media or reports from their family. For example, vocal pro-vaccination athlete Uche Nwaneri, the 38-year-old former Jacksonville Jaguars American Football player who said anti-vaxxers should be jailed – until he died suddenly.

There are many countries or states with large populations, that have almost no reports in our list. That probably means events are not being reported to us. The true death and injury numbers are likely to be very much higher than we list here.

## Prior Year Data

Gary Dempsey, professional soccer player played 500 games over 20 years, with no cardiac arrests.

The International Olympic Committee in Lausanne, Switzerland, studied documents from international data banks from 1966 to 2004. Those documents indicate 1,101 sudden deaths in athletes under 35 years of age, an average of 29 athletes per year, the sports with the highest incidence being soccer and basketball. ([NIH Document](#))

A [study by Maron](#) on sudden death in US athletes, from 1980 to 2006 in thirty-eight sports identified 1,866 deaths of athletes with cardiac disease, with a prevalence of hypertrophic cardiomyopathy.

2005 to 2006 averaged sixty-six (66) deaths per year, with 82% of those occurring during competition or training.

Thanks to investigator readers for discovering these reports, and this story in Spanish: [Momento Deportivo](#).

In 2021 and 2022 so far, cardiac disease has not been mentioned. Hypertrophic cardiomyopathy was mentioned twice, but those two reports were listed in the “not vax related” list. “Enlarged heart” was only mentioned three times, but there was no indication this was a long-term or recent issue (possibly due to vaccine injury).

The above shows that in prior years, there were 66 deaths per year, but there have been 89 reported in January 2022, so far.

Athlete collapses and deaths chart from 1st January 2021 to 31st December 2022. Good Sciencing.

# Growing Report

This story will grow over time, as new information is added. If you have proof of information that we don't already have, or if you have a correction, please send it through our contact form, with as much information as possible. Useful information would be the person's name, age, what happened to them, if they had the COVID vaccine(s), date of event or death, link to any news story.

Special thanks to readers who have provided corrections, found errors that we missed, or provided new information we didn't know about. It is now a real team effort and we appreciate it.

**Currently reviewing** 4 new reports. Jan 7th 2023 (4 from this week 2023). Building a new chart now.

**New Note:** The number of new cancers appear to be increasing. In other places, we have seen doctors reporting that there are 5 times more cancers and many of those go straight to stage 4. We draw no conclusions from this, but the small list we are working on contains several newly-discovered cancer deaths.

Please note that although this chart closes off 2022, based on what happened every month for the past two years, the numbers for all months will continue to increase as researchers discover them, especially the most recent three months.

For the skeptics who believe this is normal, feel free to repeat the following 18 words, after reading each name in this list.

## Repeat This After Reading Each Line

***“The COVID vaccine is a normal vaccine. The COVID vaccine is safe. These injuries and deaths are normal.”***

## December 2022 – (Day/Month/Year)

### 1. 30/12/2022 Indiana, USA **Dead**

Uche Nwaneri (38), former Jacksonville Jaguars American Football player was found unresponsive after a cardiac arrest. He was pro-vaccination, and often spoke about jailing anti-vaxxers. “OK so lets get these vaccine mandates and Vaccine passports up and running ASAP. We seeing children DIE from the unvaccinated selfishness. Pregnant women at risk too. PROTECT LIFE. MANDATE THE VACCINE. Jail anyone who refuses, to protect LIFE.” [News Story](#) [News Story2](#) [News Story3](#)

Steve Stricker (54), Golf – Winning Ryder Cup captain says he's lucky to be alive after suffering a 'mystery illness' that put him in hospital for weeks, twice, and his immune system was down. He was vaccinated. Symptoms: bad cough, sore throat in mid-October then inflammation around the heart. His doctor prescribed amoxicillin – then his throat started to close up, lips, glands, and tongue got puffy. 103-degree temperature. He went to hospital two weeks before Thanksgiving and his liver numbers started getting worse, white blood cell count was high. I was fighting something, but they couldn't find out what it was. My liver was going downhill. I got jaundice. I was yellow and peeing out Pepsi-colored pee. He tested negative for COVID, but his heart was jumping out of rhythm. He was in and out of the hospital twice. Months later, he can't do activity, has inflammation around the heart, lost 25 pounds, lost muscle and his skin is saggy. He is still unable to eat solid food 3 months later. Move to mid-October. [News Story](#)

Leo Forstenlechner (12), Gunners Ice Hockey player had a “respiratory arrest” at home and then spent a few days in hospital and died. Facebook (snapshot taken)

067. 17/12/2021 Los Angeles USA

Donald Parham (24) Los Angeles Chargers (NFL) tight end player collapsed in mid-air while taking a flying touchdown catch. He had received two Covid-19 vaccines and a booster. His arms were shaking as he was wheeled off. It appears clear that his left arm locked up before his helmet hit the ground – that seems to be why he didn't handle the recovery well. The Chargers report he suffered a concussion, but the video tells a different story, a fraction of a second before his helmet touched down and his head suddenly threw back. The key to seeing this is to watch the action from the sideline, one frame at a time. [News Story](#)

068. 17/12/2021 England

Abu Ogogo (32), Southend United Football midfielder diagnosed with pericarditis -inflammation around the heart muscle. Head coach Kevin Maher said "Abs initially had a dead leg and he got another knock on that, but since then he's reported a few problems with his chest. He went for a check-up at hospital last week and he's out for a period now, probably about a month or so." The report also mentions that "A dead leg could also be the result of a widely reported adverse reaction from the vaccine where a blood clot impairs blood flow to a major limb." [News Story](#)

558. 26/06/2021 Corsico, Milano, Italy

Alexandre Joao Kisonga (37), professional basketballer, Congo-Angolese origin lived in Italy since age 4, had Astrazeneca viral vector vaccine 6th April 2021, suffered exhaustion and slight pain during inoculation. On June 22 for his second vaccination, Astrazeneca was banned. The doctor asked him to choose Moderna or Pfizer (mRNA vaccines) – how could he possibly know the consequences? The doctor recommended Moderna and he agreed. Four days later, he felt exhaustion, tiredness and pain in the neck on the morning of a training session. After training, headaches began and his body temperature rose excessively. Headache continued for several days and his temperature rose again. On medical advice, he took Tachipirina to lower fever. A week later, he was no better and tried a COVID swab which returned a negative result. A week later, symptoms continued and he went to the hospital in Milan, diagnosed with tachycardia. Doctors did not want to talk about the vaccines but eventually diagnosed acute perimyocarditis. Six months later, he still cannot play. UPDATE: Jo says he will undergo a stress test January 11 2022, to see if he can return to play basketball. He expects to have a scar on his heart for life and will take 2 tablets a day for the next year. It may affect his physical activity.

Giuseppe Perrino, 29, from Fujimarinno, Italy. Collapsed and died during a tribute game for his dead brother, Rocco. Paramedics at the scene tried to resuscitate him, but were unsuccessful. Thank you Joanna. [News Story](#)

582. 03/06/2021 Macedonia **Dead**

Marko Bozinovski (20), RK Butel Handball player and Macedonian youth representative collapsed and died due to a heart condition, the Macedonian Handball Federation said. No cause of death given, but speculated that it is a heart problem. His death is only 6 days after Nikola Danilovski. [News Story](#)

583. 02/06/2021 Kazakhstan **Dead**

Stanislav Lunin (28), FC Kairat professional footballer in Kazakhstan. It was announced that the player had

died. No further information available. [News Story](#) [News Story2](#)

584. 01/06/2021, Denmark

Christian Eriksen(29), star Inter Milan footballer collapsed with cardiac arrest on the pitch 12 days after receiving a Pfizer vaccine on May 31st. Revived with defibrillator. Team doctor confirmed the team was vaccinated on May 18th – this may have meant all had received at least one covid19 injection, because another report mentions May 31st. In February 2022, BBC reports Eriksen will play for Brentford, a smaller Premier League team in West London on February 26th. [Followup Analysis](#) [News Story](#) [News Story2](#)

## May 2021

585. 31/05/2021 Bristol, England **Dead**

Adam Bounds (41), football player died 31/05/21 of a severe brain-bleed in Derriford Hospital 11 days after AstraZeneca vaccine [News Story](#)

586. 30/05/2021 (exact date unknown, but prior to 01/06/21, when Christian Eriksen collapsed)

Marvin Schumann, a Gifhorn amateur player revived after cardiac arrest. [News Story](#)

587. 29/05/2021 Macedonia **Dead**

Nikola Danilovski (24), Metalurg Skopje handball goalkeeper died, suspected drowning in Lake Ohrid after possible cardiac arrest. [News Story](#)

588. 28/05/2021 Seattle, USA

Stefan Frei (36), Seattle Sounders goalkeeper. Seattle Sounders announced in April the team is “fully vaccinated.” In May, it was reported that blood clots in his knee could keep him out for 3-6 months. [News Story](#) [News Story2](#)

589. 27/05/2021 Sweden

Oscar Pettersson (21), Akropolis IF Footballer developed a very high fever earlier in the month. Spent 4 days in hospital. Diagnosed with heart muscle inflammation. Advised not to play Football for at least 6 months. [News Story](#)

590. 25/05/2021 Sweden

Viktor Larsson (31), Mountain Biker prepared to take part in the World Cup in mountain bike orienteering but was diagnosed with myocarditis. [News Story](#)

591. 18/05/2021 Switzerland

Michaël Perrier (32), Stade Lausanne Ouchy football player. During a team outing, the Swiss footballer suddenly suffered a serious cardiac arrest. It was after his first dose (23/04/2021) of the Moderna vaccine. He received 5 shocks of a defibrillator, then stayed 3 days in an artificial coma. A defibrillator was implanted to prevent a future cardiac arrest, and stayed 2.5 weeks in hospital. After 5 months rest, some arrhythmia and light inflammation was still present, so he was unable to return to high level football. [News Story](#)

592. 14/05/2021, Malaysia **Dead**

Haziq Kamaruddin (27), Olympian archer died of coronary artery disease. Died 10 days after Pfizer

injections on 13th April and 4th May 2021 [News Story](#)

638. 03/03/2021, Wallkill Central School, New York, USA (17), **Dead**

Miguel Antonio Lugo (17) high school football player collapsed and died during football practice.

## February 2021

639. ??/02/2021 Norway

Sander Haugrud (24), Norwegian kickboxing champion in 2019. Two weeks after his second COVID vaccine, stabbing chest pain started, after no previous history of heart problems or any health issues. Diagnosed with pericarditis. Physician at the hospital confirmed it was due to the vaccine. Sander Haugrud: “A couple of weeks after the second dose, I got a sting in my chest that turned out to be heart bag inflammation. I was on surveillance for three days. I have competed nationally and internationally in kickboxing, since the age of 10 to now. But it’s a full stop at training and I don’t know if I can ever train like I did. Now I’m mostly in prison. This might have been avoided, if I had a corona instead, I guess I’d be well by

now. It is scary to know that no one mentions anything, I had to dig myself to find information, then I found that there were many cases like mine. At the hospital, doctors had a hard time believing the inflammation was due to the vaccine, but in the end the superior admitted it and said to report it to the Drug Enforcement Administration.” Videointerview in Norwegian: [News Story](#) [News Story2](#)

640. ??/02/2021 Sweden

Andreas Quist Svensson (21), Eskilsminne IF U21 Football forward player joined Eskils around 28th January 2021, but never played a single game before suffering from myocarditis/pericarditis and was not allowed to touch a ball or train for two months, but this turned into 7 months. He was reported to start training again in August 2021 and played for the first time on 25th September 2021. Need dates of injury and vaccination. [News Story](#) [News Story2](#) [News Story3](#)

641. 22/02/2021 Queensland, Australia **Dead**

Dale Best (34), Maroochydore Swans Rugby League player collapsed during a match. Sports trainers performed CPR then paramedics attempted to stabilise the player. He was taken to hospital, where he later died. [News Story](#)

642. 22/02/2021 Portugal **Dead**

Alfredo Quintana (32), a Cuban handball goalie in Portugal. Collapsed after going into cardiac arrest during practice. Died four days later. [News Story](#)

643. 21/02/2021 Croatia **Dead**

Zlatko Saracevich, (59) (former Yugoslavia handball player and world handball champion), won Gold with Croatia at Atlanta Olympics, and recent handball coach. His team just won in a derby against RK Lokomotiva 32:29, and he collapsed with a cardiac arrest just after he gave a media statement. Resuscitation failed. [News Story](#)

644. 18/02/2021 Maharashtra, India **Dead**

Babu Nalawade (47), cricketer collapsed with a cardiac arrest while playing in a match. He died. [News Story](#) [News Story2](#) [News Story3](#)

## **NOTE: No reports below this point are included in the counts in the Headline**

NOTE: No reports below this point are included in the Vaccine counts in the headline because of insufficient documentation or other causes are more likely.

## **No documentation found yet**

Investigations in progress. No news media documentation found in this section so far. **Some names may be spelled incorrectly. Dates may be wrong.** We found correct details for more than 10 like this so far. Now we are adding them to this area of the list, but not counting them in the headline total, until documentation is found. Any assistance would be appreciated.

1. 18/01/21 Turkey

Ibrahim Khalil (49), a Turkey national athletics team coach. Died of a heart seizure.

2. 22/08/21 Dead

Milos Georgeevic, 31, died in his sleep, apparently from a heart condition.

3. 13/10/21 Italy, Dead

Ricky Pirrallo (29), soccer player from Cigliano, Italy. Died suddenly. This may refer to Rocco Perrino, possibly a translation error, as the original reference to this may have been in Hebrew.

4. 10/11/21 Brescia, Italy

Armano Ferrari (51), soccer coach in Brescia, Italy, died suddenly. No information found, even using different names. Possibly incorrectly reported.

5. ??/11/21

Andrea Corcio (42), Italian football coach. Died suddenly.

## May Or May Not Be Vax Related

There is insufficient information to decide if any of these collapses or deaths are related to COVID vaccinations. More investigation is needed. Any help would be appreciated because keeping with the ongoing investigations isn't easy. These are listed here because they appear in some lists as vax-caused, but we believe there is either currently insufficient information to decide or other explanations seem to overrule vax-caused, such as cancer.

Some of these people should be in the main list. We hope that eventually, their friends and relatives will provide us with more information about vaccination status, or what happened to them in the days weeks or months before they died.

1. 21/12/2022 Russia [Dead](#)

Victoria Vinogradova (17), WFC CSKA Football goalkeeper became ill and died while visiting a friend, who is in intensive care. Pravda says a packet of methodone was found near the bed where she died, and that her body was yellow. [News Story](#) [News Story2](#) [News Story3](#) [News Story4](#)

2. 15/11/21, USA [Dead](#)

Jason Plummer (52), Australian Olympic swimmer (1988). No cause given (seems suspicious) [News Story](#)

3. 17/09/2022 Costa Rica [Dead](#)

Kalani David (24), Hawaiian surf and skate prodigy, collapsed and died of a "massive seizure" while surfing in Costa Rica. He had a congenital heart condition Wolf Parkinson White Syndrome which had caused him seizure problems over many years. [News Story](#) [News Story2](#) [News Story3](#)

4. 22/07/2022 USA [Dead](#)

Dwight Smith (58), former Atlanta Braves and Chicago Cubs Baseball player (8 seasons), died of "congestive heart failure." [News Story](#)

5. 16/07/2022 Italy [Dead](#)

Ricky Bibey (40), professional Rugby League player for Wigan Warriors, St Helens, Leigh and Wakefield

Trinity. He died in a hotel room in Italy aged 40. Police suspect a seizure or heart attack. Items in the room suggest a sex game went wrong. It was later reported he suffered from mental issues and was viciously beating his long-time girlfriend when he suffered a “heart attack.” Forensic officers searched the hotel room, requested a post mortem examination and toxicology reports. [News Story](#) [News Story2](#) [News Story3](#)

6. 15/04/2022 Quebec, Canada [Dead](#)

Mike Bossy (65), Canadian former New York Islanders Ice Hockey player who became “one of the NHL’s all-time greatest goal scorers” died of lung cancer. [News Story](#) [News Story2](#)

7. 10/04/2022 Pennsylvania, USA [Dead](#)

Gary Brown (52), former NFL New York Giants American Football player and then coach died of “liver and kidney failure after beating cancer twice.” [News Story](#) [News Story2](#)

8. 08/01/2022 Kansas, USA [Dead](#)

Matt Miller (49), former Kansas State Wildcats American Football and baseball player who later became the Wildcats’ coach. He died of cancer. [News Story](#) [News Story2](#) [News Story3](#)

9. 08/01/2021 Portugal [Dead](#)

Paulo Diamantino (35), Mirandela Basquetebol Clube Basketballere. Suffered a sudden cardiac arrest while preparing for the second part of the match against Juventude Pacense. Resuscitation attempts over the next hour were unsuccessful. [News Story](#) [News Story2](#)

10. 25/01/21 USA

Jack Draper (19), Tennis player collapsed during a game against Kazakhstan’s Mikhail Kukushkin at Miami Open first set on a hot humid day. Possibly heat-humidity-related, but it was only the first set and only 80 degrees. [News Story](#)

11. 30/01/21 Indianapolis, USA [Dead](#)

Wayne Radford, 64, an NBA star and former Indianapolis team star, died at his home in Indianapolis. Possibly of cancer [News Story](#)

12. 04/04/21 Russia [Dead](#)

Nikita Sidorov (18), youth team footballer for the Professional Football League (PFL). Died 5 minutes after coming onto the pitch as substitute, during a game at Torpedo Stadium. Resuscitation was unsuccessful. A doctor said he had a cerebral aneurism and internal bleeding. News reports talked about an autopsy and investigation, but no further information has been discovered. [News Story](#)

13. 18/04/21 USA [Dead](#)

Antron Pippen (33), basketball player for Texas A&M and later World Basketball Association’s Heat Upstate team. Died unexpectedly, with no known health problem, accident or other causes of death. His father Scottie said Antron had chronic asthma, but would not reveal cause of death. [News Story](#)

14. 30/04/2021 India [Dead](#)

Jagdish Lad (34), bodybuilder died in a hospital in Vadodara, Gujarat, having been on oxygen support in his final four days, possibly from lack of available treatment. [News Story](#)

15. 12/08/21, USA (16), [Dead](#)

Drake Geiger (16), 6’ 3” 400-pound Nebraska Football player collapsed and died during a practice break,

after only playing for 10 minutes. His father, Scott Hoffman said they were recently in Las Vegas, where it was hotter and he had no problems there. The autopsy apparently said his death was due to “hyperthermia, enlarged heart and heart problems,” but he had passed a physical exam a week before training. Sadly, there is no information on vax status, but it would be pertinent. Too many autopsies are hidden or contain scant information, as though they want to protect Big Pharma. All we want is the truth. [News Story](#)

16. 12/08/21, NZ (24), [Dead](#)

Olivia Podmore (24) NZ Olympic Cyclist died suddenly and mysteriously in her room, Coroner investigating cause (possible suicide). A friend said, “I was the last person to see her alive. If you had seen her in the last 72 hours, you wouldn’t have thought this could happen.” [News Story](#)

17. 12/08/21, USA (27), [Dead](#)

Cameron Burell, Sprinter died mysteriously, ruled suicide by self-inflicted gunshot to the head. Was he vaxxed and if so, did he know his career was over? [News Story](#)

18. 19/08/21 [Dead](#)

Phil Hernon (55), Bodybuilder died after ‘sudden recent decline,’ possibly dialysis related [News Story](#)

23/01/2022 Spain

Jesus Sánchez López aka Chechu (29), Egabrense footballer collapsed during a football match after a collision with the goalkeeper. Chechu was unconscious and had breathing problems so was transferred to hospital. Recovered after time in hospital.

22/03/2022 USA

Rafael Nadal (36), Majorcan fully vaccinated star Australian Open champion tennis player is out for at least 6-8 weeks after his defeat by Taylor Fritz in Indian Wells, due to pain and breathing problems, reported as a rib stress crack. After a match, Nadal told reporters, "When I try to breathe, it's painful ... It feels like needles." Nadal had previously mocked Djokovic for not being vaccinated. [News Story](#)

21/05/2022 Tasmania, Australia

Tobi McInnes (Age), Burnie Dockers Football Club Australian Rules Footballer suffered a cardiac arrest during an off-the ball fight with an opposing player, Penguin, who slapped him in the face twice. He was taken to Launceston General Hospital. On Sunday evening, he was conscious and stable but was undergoing tests to determine his condition. [News Story](#) [News Story2](#)

## Players Talk

23:52

## Sidelined Athletes with “Illness” Not Included in This Report

Many sports teams now have multiple sidelined players. There are dozens of them. The teams and Big Media are hiding this, thinking nobody will notice. These damaged players will not be shown in this report if they are reported only as “illness” but they would be worth tracking, because it is not normal to have so many. Their

immune systems are likely to have been compromised by “something,” so they will be open to many things they would normally have been able to shrug off. We leave it to others to track these – we have our hands full handling the investigations for this list, going back in time trying to find new information that wasn’t available before, and making minor corrections as they are discovered. It will all come out eventually.

## List of Injuries

Here is a non-exhaustive list of injuries reported. Most were cardiac arrest.

- Cardiac Arrest
- Blood Clots or Thrombosis
- Stroke
- Irregular Heartbeat
- Arrhythmia
- Neuropathy
- Death

## Military Death Increases

Thomas Renz, an American lawyer says that the U.S. military’s DMED (Defense Medical Epidemiology Database) database shows that in the first 10 months of 2021, that “All cause morbidity” increased 11 times (1100%) against the previous year. Renz has information from DoD whistleblowers. The DoD is reportedly actively deleting data from the database, possibly to cover up the genocide that has been perpetrated on military personnel.

He also said they expect the numbers for 2022 to be up by 5000% – i.e. 50 times the previous year.

## Good Sciening Reports

Our ongoing updates to the chart in this post clearly show the growth of adverse events on sports people.

One person said we were hiding things because we’re only showing “the barest” of 2022. Sorry about that, but we don’t have a crystal ball to see into the future. The only things we expect are that a) some people will continue to be “surprised” about the number of athlete deaths over the coming months, and b) although it is February, injuries and deaths that happened in prior months will be continue to be discovered in the future.

We know that we do not have all of the cardiac arrest reports and we don't have all of the deaths. The sports clubs are still hiding the cases where players did not die and did not make it into the news. We suspect that many players that "*suffered from a mystery illness*" were told to go home, rest and suffer in silence.

## Dates of First Vaccinations

The dates of first "available" vaccinations vary all over the world, in different states and different cities. We have a small collection of data [in a separate story](#) and we know there were trials in the months before official rollouts, so just because a country started its rollout on a particular date, that doesn't mean some people didn't receive their vaccinations in the weeks and months earlier. If we get definitive proof that someone was not vaccinated, we amend the record. Officials and the media are now doing a great job of hiding all the useful information. They are also calling vaccinated people unvaxed if it hasn't been more than two weeks after their vaccination, and if they are due for their booster and they don't get it, they are labeled unvaxed. (i.e. the government and media are telling lies – it is a clever scheme, but it is still a lie.)

For example, Australia's first human trials of a candidate COVID-19 vaccine was the Novavax NVX-CoV2373 in Melbourne by 26 May 2020. There is no documentation showing who took part in the trials. The Therapeutic Goods Administration approved the Pfizer–BioNTech vaccine on 25 January, the Oxford–AstraZeneca vaccine on 16 February, and Janssen vaccine on 25 June. Phase-1a started on 21 February 2021 and phase-1b of the roll-out began on 22 March.

The Philippines began phase 3 COVID-19 vaccine trials in early November 2020. Phase 3 is the point at which thousands of people are vaccinated, prior to consideration for approval for rollout, and people were being vaccinated in the previous months.

## Clubs Hide Vaccination Information Now

Here is a demonstration of how sports clubs do not want the injuries or deaths of their players to be associated with the COVID vaccines. It tells the story of why they will not report which of their players has been vaccinated and when. Sunderland FC manager Lee Johnson suggested that the COVID vaccines may have caused the heart issues for his goalkeeper, Lee Burge. The club then sacked the manager.

Form your own conclusions as to why the club would sack the manager who cares about his players.

## Definite Proof of Vaccination

The so-called fact-checkers are trying to say that because we don't always have definitive proof of vaccination, then 100% of the data we're collecting is worthless. Well, good news, fact-checkers, you are not only wrong, you are idiots.

While historically there have been a relatively small number of athlete deaths each year that weren't from old age or cancer, there has never been anything like what is happening since the COVID vaccination trials started. And they know it, but they don't care. We will continue to gather as much information as possible about every person who dies. These are real people, not just numbers.

As we said elsewhere, we're collecting data. Other people can use this data and add to it, if they can, to research whatever they want. We won't be distracted from that, even if families, clubs, governments and the media hide information from us. We don't want to hurt families, but families can't hide real data because that could harm other people.

According to governments, 90-95% of populations all over the world are now vaccinated, so the fact-checkers have a problem. If that is true, then just about everyone is vaccinated. If it isn't true, then governments are lying, possibly for the purpose of coercing those who don't want their vaccinations, for various reasons. We will publish as much data as we can find, and from time to time, we and readers will discover information that wasn't found earlier, and it will be added.

## Hate Mail And Death Threats

As well as receiving new cases and updates from alert readers, we are also receiving hate mail and death threats/wishes. Haters need to get a life. The sports people suffering these adverse reaction and deaths didn't ask for this. Neither did the tens of thousands of other people. They all thought they were doing the right thing. Many were coerced into getting the vaccinations. When one of these adverse events happens to you or one of your kids or relatives, you'll be glad we're collecting all this data. If you are one of the haters who thinks vaccination is the way out of this nightmare, read the story about [three young women whose lives have been destroyed by the vaccine](#).

We're not going to stop what we're doing. April 2022 update: The hate mail and death threats stopped – the overwhelming data is now widespread and it is too late to stop it getting out.

## Interesting Notes

Several readers sent a video about Australian Cricketer Shane Warne. The man in the video is Blair Cottrell – he is NOT Shane Warne's son. We cannot yet verify the claim that Shane Warne complained of chest pain previously, or that he planned to get medical help in Indonesia. We note a small number of deaths later marked as "*suicide*" but no explanation – we are constantly looking to update reports, but a declaration of suicide with no other reason provides nothing useful. We're still looking.

## Where Are The Serious Fact-Checkers?

Readers are writing to us asking for comparisons from previous years. Some say without that, these results mean nothing. That's not true because if we had seen this in previous years, it would be well known and others would have documented it. We are starting to work on this – it is a lot of work.

Where are the fact-checkers? Where is the mainstream media? Some have piles of money from Bill Gates. Why are they not proving us wrong by all piling on and showing the documented Athlete deaths from 2019, 2018, 2017 and the previous decade?

They are nowhere to be found because this number of athlete deaths is abnormal and they know it. They have money from people who don't want journalists poking around. So that's why they don't try to thoroughly Fact-Check these reports or show previous year numbers.

Follow this link to see [Gates Foundation handouts](#) to some media that could do it. For example, NPR in the USA received \$24 million.

The Gates Foundation also funded many investigative journalism centers, with around \$38 million. Could that be why journalistic curiosity suddenly stopped being a thing?

A few weak attempts at “*debunking*” this data have started to come out, but they cherry-pick a small number of the entries and try to use that to discount everything.

## Thanks to Many Contributors

Many people are contributing to this, some indirectly by reporting to Telegram groups and other websites. There are many duplicates and in some cases, people report things we've had for months, but every report helps because sometimes there is a small piece of information we didn't have before, such as a date, an autopsy report, a name spelling, or a report from months ago that never made it into a news story. That was the case with Chuck “Kali Muscle” Kirkendall. Helpful websites include [DVDbeaver](#), [The COVID Blog](#).

## Update Notes

\*\* Passed 1000 deaths (1014) with 1485+ reports on 14th November 2022.

**Update: Nov 9, 2021:** Five added, two more deaths.

**Update: Oct 28:** Rugby player Tevita Bryce, listed as dead, was actually revived after his heart stopped for 28 minutes

## Severe Reactions And Deaths Continue

That is the current list ... most, if not all of these athletes have suffered heart problems after COVID vaccines. At the time of initial writing, 28 died. That was not normal, but then, 10 days later, 56 deaths were listed, and the numbers are climbing. Any other real vaccine would have been pulled off the market long before now. The media would be asking questions. They would be pressuring governments. But they are not. And governments continue running TV and radio and newspaper ads encouraging people to get their 1st, 2nd, 3rd, 4th covid19 injection. Perhaps that is why the mainstream media are saying little, because they are collecting government money for ads?

The deaths and severe reactions will continue until so many people die that it becomes obvious the vaccine is 10x to 100x worse than the virus it is supposed to treat.

These athletes are the canaries in the mine that warn us of imminent danger. They are being hidden so the people who are not paying attention do not see the warning.

We only see the athletes because they are in the spotlight. The nobodies – i.e. most citizens – do not make the news.

[More Information.](#)

[Why are athletes collapsing?](#)

## Reverse Sorting by Date

With so many athletes dying in 2021 and 2022, the list grew so large that many people asked for a reverse sorted list, because they keep coming back to see see new additions. We are working on a database that might allow various sorting criteria, but for now, it is managed manually. Please be aware that each week, mainly thanks to readers, we discover new entries and additional information in previous months.
